

DOMPATENT is seeking to fill the vacancy of a

Trainee patent attorney (m/w/d) – information technology

WHO WE ARE:

DOMPATENT is a well-established partnership of patent attorneys and attorneys at law located in Cologne, an exciting and lively city not only famous for her cathedral and beer. **DOMPATENT** stands for more than 70 years of highly professional service in the protection of intellectual rights.

WHAT WE DO:

We at **DOMPATENT** are engineers and scientists who have the specialized qualifications necessary for assisting clients in obtaining patents, trademarks and designs, i.e. exclusive rights granted by the state allowing their owner to control commercial exploitation of their ideas. In doing so, we focus on drafting, filing and prosecuting patents, trademarks and designs, participating in patent infringement and patent invalidation proceedings, negotiating licence agreements, conducting freedom-to-operate analyses and providing general intellectual property strategy consulting with the best interest of our clients at heart.

WHY BECOME A PATENT ATTORNEY?

Patent attorneys work in a unique space where law, commerce and technology overlap. One of the engaging aspects of being a patent attorney is being able to actively utilize both scientific and legal knowledge. Working with leading-edge technologies and innovations, as a patent attorney you are charged with challenging tasks that require creative thinking as well as analytical reasoning, making the job intellectually very stimulating and providing for a rewarding career rich in variety.

WHAT WE OFFER:

- ▲ on the job training in a large team of patent attorneys
- ▲ close and personal cooperation with a patent attorney in the respective technical field
- ▲ competitive salary and the opportunity of a raise during the training ship
- ▲ long-term perspective of working as a patent attorney for **DOMPATENT**
- ▲ assumption of costs for training courses, study materials and travel expanses

WHAT WE ASK:

- ▲ graduate or post-graduate degree level in electrical engineering or information technology
- ▲ solid knowledge and experience in the fields of information technologies, digital communication and preferably software technologies
- ▲ excellent communication skills in English, especially in writing
- ▲ an ability to focus on the details as well as being able to see the bigger picture
- ▲ the ability to work to tight deadlines and to handle several projects simultaneously

YOUR JOB?

Ms. Elena Benaissa is looking forward to receiving your application letter and resume at bewerbung@dompatent.de
